EDITORIAL REVIEW

Physiological basis for absorptive and renal hypercalciurias
C. Y. C. Pak

Chronic blockade of angiotensin II formation during sodium deprivation
J. E. Hall, A. C. Guyton, M. J. Smith, Jr., and T. G. Coleman

Bradykinin-induced renal hemodynamic alterations: renin and prostaglandin relationships
W. Flamenbaum, J. Gagnon, and P. Ramwell

Influence of hypertonic saline on canine renal blood flow and renin release
J. G. Gerber, R. A. Branch, A. S. Nies, J. W. Hollifield, and J. F. Gerken

Effect of acetazolamide on bicarbonate reabsorption in the proximal tubule of the rat

Solvent drag component of Cl⁻ flux in superficial proximal straight tubules: evidence for a paracellular component of isotonic fluid absorption
T. E. Andreotti, J. A. Schafer, S. L. Troutman, and M. L. Watkins

Blockade of postocclusive renal vasoconstriction by an angiotensin II antagonist: evidence for an angiotensin-adenosine interaction
W. S. Spielman and H. Osswald

Indirect evidence for enhancement of Na-K-ATPase activity with stimulation of rectal gland secretion
P. Silva, J. Stoff, and F. H. Epstein

Volume expansion-induced alterations in proximal tubule chloride gradient in the rat

Renal autoregulation of blood flow and filtration rate in the rabbit
C. E. Ott and R. C. Vari

Influence of mucosal and serosal pH on antidiuretic action in frog urinary bladder
M. Parisi, J. Chevalier, and J. Bourguet
