The American Journal of Physiology-Renal Physiology covers all areas of renal physiology, including:

- original, innovative research on the kidney, urinary tract, and their respective cells and vasculature
- thought-provoking investigations involving human and animal models, individual cell types, and isolated membrane systems
- cross-disciplinary papers on the pathophysiological basis of disease processes in the kidney, the urinary tract, and in the regulation of body fluids
- timely editorial reviews

Authors are required to submit papers online at www.apscentral.org.

Under the NIH Public Access Policy, NIH is asking its funded investigators to voluntarily submit to PubMed Central (PMC) the author’s final manuscript of articles resulting from research supported in whole or in part with direct costs from NIH. According to the NIH, this policy applies only to manuscripts accepted for publication on or after May 2, 2005.

If you choose to submit your accepted manuscript to PMC, you will be asked to indicate when that manuscript should be made available to the public. As copyright holder of your article, the APS has the sole right to publish or disseminate it. However, the APS grants you permission to allow public release of your manuscript through PMC 12 months after publication in the print version of an APS journal. This period of time is consistent with our existing policy to make all content publicly available through HighWire Press 12 months after print publication. NIH will be able to determine when 12 months have elapsed because APS sends NIH electronic feeds of the article metadata upon publication in a journal issue. Therefore, you can submit your accepted manuscript to PMC at the time of acceptance to an APS journal, and will not have to calculate or track time elapsed from publication.

NIH intends to use the PMC database of manuscripts for portfolio management; to create a permanent archive of articles based upon NIH-funded research; and to give the public access to research publications. In announcing this policy, NIH officials underscored that it is voluntary and there will be no sanctions of any kind against authors who do not submit their manuscripts. If you have any questions with respect to the NIH Public Access Policy and the publication of your article in an APS journal, please contact Margaret Reich at mreich@the-aps.org.

LATE BREAKING CALL FOR ABSTRACTS
Deadline for Submission: Wednesday, February 28, 2007
www.eb2007.org

Late-breaking abstracts will be accepted beginning Monday, December 4, 2006. The abstracts will be accepted for poster presentations only and scheduled in poster sessions on Wednesday, May 2, 2007.

Late-breaking abstracts will be published in an addendum to the meeting program. The abstracts will also be published in the online version of The FASEB Journal.

Late-breaking abstracts must be submitted online at www.eb2007.org with the $90 abstract fee by Wednesday, February 28, 2007.

For information about the meeting including topic categories for late-breaking abstracts, preliminary program, housing, and registration go to www.eb2007.org. If you have questions, Contact eb@faseb.org.
