American Journal of Physiology- Renal Physiology

Scope of Journal

The *American Journal of Physiology-Renal Physiology* covers all areas of renal physiology, including:

- original, innovative research on the kidney, urinary tract, and their respective cells and vasculature
- thought-provoking investigations involving human and animal models, individual cell types, and isolated membrane systems
- cross-disciplinary papers on the pathophysiological basis of disease processes in the kidney, the urinary tract, and in the regulation of body fluids
- timely editorial reviews

Authors are required to submit papers online at www.apscentral.org.

FEDERATION of AMERICAN SOCIETIES for EXPERIMENTAL BIOLOGY

FASEB

Benefits for FASEB Society Scientists

The Federation of American Societies for Experimental Biology is an organization of multiple member societies representing tens of thousands of life scientists.

Working closely with member societies, FASEB staff provide strategic intelligence on policy developments, conduct policy research, and engage government and media relations.

HOW FASEB HELPS YOU

In addition to the benefits you receive from being a member in your own professional society, you also receive a variety of important benefits through your society's membership in FASEB including:

- Access to FASEB's Legislative Action Center
- FASEB's Washington Update
- Subscription discounts for *The FASEB Journal*
- Members only online access to the FASEB Directory of Members
- CME at FASEB Summer Research Conferences and society meetings
- Career development resources
- Personal insurance programs
- Credit card and line of credit programs

To learn more about FASEB, visit www.faseb.org and go to "Information for Scientists" to download a brochure.

Call toll-free 800.43FASEB or email memberbenefits@faseb.org.
