The American Journal of Physiology - Renal Physiology covers all areas of renal physiology, including:

- original, innovative research on the kidney, urinary tract, and their respective cells and vasculature
- thought-provoking investigations involving human and animal models, individual cell types, and isolated membrane systems
- cross-disciplinary papers on the pathophysiological basis of disease processes in the kidney, the urinary tract, and in the regulation of body fluids
- timely editorial reviews

Authors are required to submit papers online at www.apscentral.org.

Reader & Author Benefits

- Fully searchable text, including PubMed
- Rich color and sharp resolution of figures
- Editor’s Home Page at www.the-aps.org/publications/ajprenal
- FREE access to the extensive collection of back issues available online 12 months after publication
- FREE e-mail notification of new content as it becomes available
- Manuscripts online within days of acceptance
- Perpetual/Electronic Archiving of the LOCKSS and CLOCKSS systems preserves the electronic content of all APS journals.

Authors can choose to pay $2,000 on top of regular author fees and have their article made free immediately.

To submit your MANUSCRIPT go to: www.apscentral.org
Special Call for Papers

American Journal of Physiology-Renal Physiology

Aldosterone and Epithelial Na⁺ Channels

The American Journal of Physiology-Renal Physiology is seeking manuscripts to be submitted specifically related to the biology of epithelial Na⁺ channels (ENaC) and the actions of the hormone aldosterone. This call for papers is in conjunction with the 6th International Symposium on Aldosterone and ENaC, which will be held on October 3–7, 2007. Submitted papers should address the central themes of ENaC, mineralocorticoid receptors and aldosterone signaling. Papers may focus on structure, regulation, involvement in normal and pathophysiological states, or therapeutic interventions.

All papers will receive expedited review. Authors should indicate in their letter to the editor and on the online submission form under “Manuscript Type” that the submitted manuscript is in response to a Special Call for Papers. Accepted manuscripts will be published under a distinct heading and will receive special attention and handling. Only those papers not requiring extensive revision will be published under this call.

The submission deadline is January 1, 2008. If you have any questions or currently have a manuscript on this topic that has already been submitted and would like to be included in the Special Call, please contact Dr. Thomas Kleyman, Editor-in-Chief, via e-mail at ajprenal@emory.edu.
