Am. J. Physiol. Renal Physiol. Jan 01, 2006; 290: 20-34

**New insights into the regulation of V-ATPase-dependent proton secretion**
Sylvie Breton, Dennis Brown

**Hypoxia-inducible factors in the kidney**
Volker H. Haase

Reader & Author Benefits

- Fully searchable text, including PubMed
- Rich color and sharp resolution of figures
- Editor’s Home Page at www.the-aps.org/publications/ajprenal
- FREE access to the extensive collection of back issues available online 12 months after publication
- FREE e-mail notification of new content as it becomes available
- Manuscripts online within days of acceptance
- Perpetual/Electronic Archiving of the LOCKSS and CLOCKSS systems preserves the electronic content of all APS journals

Authors can choose to pay $2,000 on top of regular author fees and have their article made free immediately.
The American Physiological Society (APS) and the Women in Physiology Committee are pleased to announce their partnership with MentorNet, an award-winning one-on-one mentoring program.

MentorNet’s Academic Career E-Mentoring Program matches graduate students, postdocs, and untenured faculty members in physiology with experienced scientists for an 8-month mentoring relationship conducted via e-mail.

MentorNet also offers a Résumé Database for students seeking jobs or internships.

Any APS Member or nonmember (of any status) can be a mentor in this program. However, to receive the benefit of coaching and guidance from a mentor, you have to be an APS Member with the status of “trainee or early career”.

Questions? Contact Melinda Lowy (mlowy@the-aps.org; 301-634-7787)

Want to use MentorNet right away? Become an APS member today. Apply online at: www.the-aps.org/memapp2/ or email: members@the-aps.org
NephCure Foundation Research Grants Available
Apply by December 17, 2008

The NephCure Foundation is a nonprofit organization with the mission to advance and support basic science research initiatives to find the cause and cure for Nephrotic Syndrome and Focal Segmental Glomerulosclerosis.

The NephCure Foundation announces its intent to support basic/translational/clinical science research initiatives to understand the cause, or to identify treatments and/or the cure for FSGS and other diseases that result in Nephrotic Syndrome.

Applications will be accepted for post-doctoral fellowships, career development awards, and to support established investigators undertaking new investigative directions.

Application deadline is December 17, 2008, for grants that begin July 1, 2009.

For more information, please see: http://www.nephcure.org/grants.html
